

Everybody says: don't buy before testing! That is true, but how to do it?

Do you visit the spots and ask other kites for a test ride? Do you visit rentals or company events?

In reality, this gets very expensive and is virtually hard to put in effect.

We have a solution: if you buy a Skywalker board, we will give you an opportunity to test it without any worries for 30 days. We are quite convinced that you will like it once you use it. Should you however within 30 days come to the conclusion that it does not suit you, you can send it back to us at your own expense and we will refund you the whole value of the board. All you have to pay are the board's shipping fees.
